# *Message from the President*

President, Robin Y.-Y. Chiou, Ph.D.

National Chiayi University is based on the magnificent merger of the National Chiayi Teachers College and National Chiayi Institute of Technology in February 2000. It is now a comprehensive university well-constituted by seven colleges, offering bachelor (BS), master (MS) and doctorate (Ph.D.) programs. It boasts a heritage of rich academic tradition and wealth of education resources. As contributed by the continued efforts to make progress, the university has stepped into its second decade, and has been recognized as an institute of higher education well-equipped with its solid framework and operating mechanism. These are the culmination of hard work contributed by our faculties and students as well as our former presidents Yang Kuo-Shih and Lee Ming-Jen. Without Yang's prospective views and Lee's steadfast implementation of leapfrogging transformation, NCYU would not have enjoyed the foundation for sustainable development or beheld the continuing progress and rising popularity.

A university is not only a place to impart knowledge and skills but a cradle of talents. On the "people-centered" campus of NCYU, our teachers and students need to contemplate the meaning and value of their existence, be committed to their work, discipline themselves, work together in weal or woe, improve school performance and dedicate themselves to their duties. Our teachers ought to devote themselves to education, research and service, and serve as educators who not only impart knowledge and skills but offer guidance in life. To become prominent talents with both moral integrity and professional skills, on the other hand, our students need to have a clear understanding of their duties, be humble before knowledge, learn with diligence and treat others with courtesy and respect.

Education requires long-term commitment and planning as well as continuing management, and we need to persevere in our effort to achieve successful education. In the coming days, we shall pursue the following eight goals on the solid ground established by our predecessors: 1. foster organizational functions; 2. enhance our competitive edge; 3. shoulder our social responsibility; 4. implement holistic education; 5. expand our academic possibilities; 6. strengthen academic-industrial cooperation; 7. Expand our view of the world; and 8. create a warm and well-disciplined campus. By establishing bonds of solidarity, cooperating in joint efforts and committing ourselves to innovative development, we as teachers and students should continue our mission to transform the University from good (grade A) to great (grade A+) so as to realize the vision of "Becoming the pride of Chiayi, and Nationally renowned as well as Internationally recognized University".

## C. 無學位的華語學習班 Non-degree Chinese Learning

國立嘉義大學之華語學習課程，內容著重於生活上的應用，語言課程不但有助於學生迅速習得正確的發音及句子結構，更結合嘉義的文化背景，發展出具有在地文化色彩的課程，此外，戶外教學使學生能融入在地生活，增加活用語言的機會

The Chinese as a Second Language (CSL) program at National Chiayi University is designed to help students communicate in Mandarin as rapidly as possible. Our program allows students to immerse in real-life experiences that foster utilization and development of Mandarin communication skills through authentic daily practices and activities. Our courses integrate all aspects of language skills needed for effective

communication in Taiwan. In our interactive classrooms, the instruction focuses on meaning and content of Mandarin rather than pronunciation drills and grammar. Students quickly acquire the native accent and correct sentence structures by using Mandarin in a Mandarin context. From day one, students begin working on improving their conversational skills.

In our Mandarin program, learning does not end when class lets out. Being that students are learning and living in Chiayi, a small historic town in Taiwan, opportunities are abounding to utilize skills learned in class out in the surrounding locale--a community rich in tradition, culture and history--to sharpen Mandarin skills. Straying from the traditional classroom course model, we also offer students rewarding opportunities to discover the local Taiwanese people and Taiwanese/Chinese culture through evening and weekend educational tours.

### 課程特色 *Features of CSL program*
