eBooks from Springer are an unparalleled resource for scientific research. Springer's eBook collection delivers complete access to the largest collection of scientific, technical and medical publications available today, including monographs, textbooks, handbooks, atlases, reference works, book series, archives and more.

The Springer eBook collection comprises nearly 200,000 titles and features research from the world's foremost scholars. And the collection continues to grow as more than 12,000 newly released STM & HSS books, book series volumes and reference works are added every year.

### Integrated and Simplified

Springer eBooks are available on SpringerLink, an integrated platform of over 9 million documents spanning the universe of scientific research. Content on SpringerLink is easily discovered and accessed; all Springer text is indexed by Google and other major search engines and fully integrated with all major link resolvers, including Summon and SFX. And because Springer content is accessible through SpringerLink, all eBooks are cross-searchable with other Springer resources including journals, reference works and protocols.

### No DRM Limitations and ePub available

Springer eBooks do not include any Digital Rights Management (DRM), which means greater flexibility and usability for library patrons. With no DRM limitations, patrons can easily access their content anytime, anywhere. And with the SpringerLink's web responsive design, users can access content from their mobile device through an interface optimized for locating and reading text on smaller screens.

Tens of thousands of the most recent eBooks are available in ePub format, for the best reading experience, especially on mobile devices.

Springer eBooks are available under a wide range of business models through carefully selected partners. Visit [springer.com/ebooks](http://springer.com/ebooks) for more information on availability and sales.

## 20 Subject Collections

Springer eBooks are grouped into 20 subject collections so libraries can quickly locate and provide the exact content patrons require – and users can rapidly find and use the relevant information they need.

As a result of the merger between Springer and Nature starting copyright year 2016, the Springer eBook collections will change its package offering with 10 additional eBook packages, specifically in the humanities, social sciences and business, management and finance disciplines, with a majority of titles from the Palgrave Macmillan imprint.

All Palgrave titles available on Palgrave Connect will be migrated to SpringerLink, and will strengthen the complete Springer eBook package offering in Science, Technology and Medicine as well as Humanities and Social Sciences.

Maureen James-Barnes, Collection Development Librarian at the University of Arkansas at Little Rock, explained that their library established their eBook collection by purchasing a very broad package through their consortium to gauge the popularity of eBooks at the university. Once they began to see success in terms of high usage, they realized the greater potential in their large collections.
